PROFESSIONAL PROFILE

Economist with quantitative expertise working at the intersection of data, artificial intelligence, innovation, and public institutions. Combines a PhD in Economics with experience across international organisations, research institutions, innovation ecosystems, and data infrastructure initiatives.

Brings together analytical, technical, and institutional perspectives to advance evidence-based decision-making, digital transformation, and responsible innovation. Experienced in leading task forces and coordinating cross-institutional initiatives across research, data, and innovation-related activities.

KEY COMPETENCIES

Econometric & Quantitative Analysis • Innovation Research • AI & Data-Driven Transformation • Privacy-Enhancing Technologies (PETs) • Stakeholder Engagement & Ecosystem Development • Cross-Institutional Coordination • Business Requirements Analysis • Analytical Reporting & Policy Recommendations • Process & Project Coordination • Training, Mentoring & Knowledge Transfer

PROFESSIONAL EXPERIENCE

Senior Data Scientist

Jan 2024 – Present

Luxembourg National Data Service (LNDS), Luxembourg

- Support the development and adoption of data services for Luxembourg's research and innovation ecosystem.
- Coordinate activities involving researchers, technical teams, public institutions, and external stakeholders across data, AI, and innovation-related initiatives.
- Contribute to the development of synthetic data and privacy-enhancing technology initiatives supporting responsible data use.
- Analyse stakeholder requirements and translate them into service improvements, operational processes, and strategic recommendations.
- Contribute to ecosystem-building activities through training, outreach, and cross-institutional collaboration.
- Contribute to the LNDS data catalogue and knowledge resources supporting data discoverability and reuse.
- Prepare reports, white papers, presentations, and briefing materials for technical, managerial, and institutional audiences.
- Led task forces on privacy-enhancing technologies and business development initiatives.

Postdoctoral Researcher (Economics of Science & Innovation)

2021 – 2023

Sciences Po & Université Côte d'Azur

- Applied advanced econometric frameworks to quantify outputs of research and innovation laboratories.
- Evaluated the impact of public funding streams on organisational behaviour and research outcome.
- Delivered data-driven policy insights to public agencies, culminating in an advisory report for the French Ministry of Higher Education and Research.

- Partnered with institutional stakeholders and academic researchers to drive collaborative research and community outreach.
- Translated empirical evidence into a peer-reviewed article, policy report, and strategic presentations for academic and government audiences.

Doctoral Researcher (Economics of Innovation)

2016 – 2020

University of Luxembourg

- Researched regional innovation, resilience, and economic growth dynamics across EU core regions.
- Formulated and executed empirical research strategies using causal inference frameworks and large-scale data modeling.
- Authored and published an article in the *Journal of Regional Science*, later recognised as a Wiley Top Cited Article (2022–2023).
- Disseminated research findings via strategic presentations to academic, policy, and institutional audiences across Europe.
- Delivered university-level teaching, supervised Master’s exams, and facilitated institutional events.

Earlier Experience (Selected)

- Data Manager / Statistical Consultant — World Health Organization (WHO)
- Research Fellow — Rovira i Virgili University
- Young Scholar — Syrian Trust for Development

TEACHING & SUPERVISION

Lecturer, Business Competitiveness and Strategic Management — Université Côte d’Azur (2023)

Teaching Assistant, Economics and Management of Innovation — University of Luxembourg (2017–2019)

EDUCATION

PhD in Economics

University of Luxembourg

MSc in Economics

Erasmus Mundus Programme, Universitat de Barcelona

BSc in Economics (Applied Statistics)

Damascus University

SELECTED PUBLICATIONS

Artificial Intelligence Adoption in Public Institutions (2026)

Independent white paper on AI adoption, organisational transformation, governance, and implementation in public institutions.

Innovation in Malmö after the Öresund Bridge (2022)

Peer-reviewed article published in the *Journal of Regional Science* (with O. Ejermo, K. Hussinger, and T. Schubert).

TECHNICAL SKILLS

Python • R • Stata • SQL • GIS • L^AT_EX • MS Office • Data Visualisation • Reproducible Research
• Structured Data Workflows • Research Data Management • Data Catalogues • Synthetic Data

LANGUAGES

English (C2) • Kurdish (Mother Tongue) • Arabic (Native) • Spanish (B1) • French (A2) • Luxembourgish (A2) • German (A1)

SELECTED HONORS

Wiley Top Cited Article (2022–2023), for “Innovation in Malmö after the Öresund Bridge” published in the *Journal of Regional Science*

Postdoctoral Fellowship (IDEX, awarded twice), Université Côte d’Azur

Erasmus Mundus Scholarship (Fully Funded MSc), Technische Universität Berlin (Erasmus Mundus Programme)
